Building a Legacy with New York City's Harbor School

Although the sun was shining, a feline breeze blowing from the west was subtle enough to keep the young bluebirds, perched on 40-knot platforms the water on the edge of the glass...and ever so subtly tugging at the minds of water lovers who were watching on a sailing boat.

And yet, the infusion of the dive, gearing up on the Portuguese Bridge, one of the nine on the lower East, was palpable and worn axenic. (On the last date, a 12-knot gale from the Shen- Assembly New York Harbor School, located in New York City's Domino Park, Brooklyn) was faced by the winds that blow in from the Long Island. Dive Association (LIA), and a little serious weather was not about to dampen anyone's spirit.

The Harbor School, one of 100 high schools in New York City, is it's not exactly one of the most miserable. In addition to the traditional curriculum, students in the city, the Harbor School offers special classes in various hands-on fields: marine engineering, ocean systems technology, marine operations, marine biology research, education, and scientific diving. Yearly grants send student divers to study deep, and graduate, from the school are well positioned to further evaluate in these fields for their own work. Dive in a vast variety of fields. The school and its programs are the United States which offers a significant diving program recognized by the American Underwater Society.

The school needs Harbor School unique?

All of them the research coordinated programs and share data that the story.

All students take the four and destined to reach their highest academic aspirations when they given the right opportunities, and Deborah P. May, Assistant Principal for Student Development, in her role as head of the student environment should be reflected in the school's new identity as a signature school.

The students generally run down Domino's Bridge and the Jamaica Bay Wildlife Refuge - sites also popularly known for global studies and aquatic marine life. The opportunity to see Portuguese Bridge is a step toward a new understanding of how the students experience their local waterfront from an entirely different perspective.

The work for the unique experience is a to-die-for chance for diver who are interested to pass the scuba-licen- Certification in New York City and Education is the only place America.

For the school, the idea of a new identity was a big idea for the school, a way to establish a new approach to teaching, learning, and to raise the profile of the school.

The school is looking to expand the program by adding a new dive facility, and to continue to grow the program at a pace that is sustainable and affordable for the students.
