LIDA Sponsors Harbor School Students On A Special Long Island Scuba Dive

What a difference a year makes!

With Sunday, September 18 blowing a bright, sunny day, many more students were able to experience a scuba dive on New York City’s only Passenger Bridge via Long Island Scuba. Students from our New York City schools of Harbor, Godwin, and Steinway were able to experience each other’s world long distances. This was the second consecutive year that the Long Island Dive Association (LIDA) has hosted the special scuba group of student dives, with each school being given an opportunity to earn the underwater world’s love and appreciation.

At the helm was instructors Michael Kasserman and Christopher Moyer with their special equipment.

The visit to the Passenger Bridge is a public high school and students’ chance to see the underwater world up close. The school provides a year of underwater education, allowing diving instruction on meeting dates. However, at the school, the students can learn firsthand underwater skills, allowing them to enjoy scuba diving as an enjoyable leisure activity. The visit to the Passenger Bridge provides students the ability to experience underwater exploration, allowing them to have a more meaningful experience.
